1. Overview

EXIN Agile Scrum Master [ASM.EN]

Scope

The Scrum Master is responsible for ensuring Scrum is understood and enacted. Scrum Masters do this by facilitating the Scrum Team in adhering to Scrum theory, practices, and rules.

In order to do this, the Scrum Master role struggles with the apparent contradiction of the Scrum Master as both a servant-leader to the team and also someone with no authority. The Scrum Master is responsible for maximizing the throughput of the team and for assisting team members in adopting and using Scrum. A successful Scrum Master influences others, both on the team and outside it. The Scrum Master helps those outside the Scrum Team understand which interactions with the Scrum Team are helpful and which aren't.

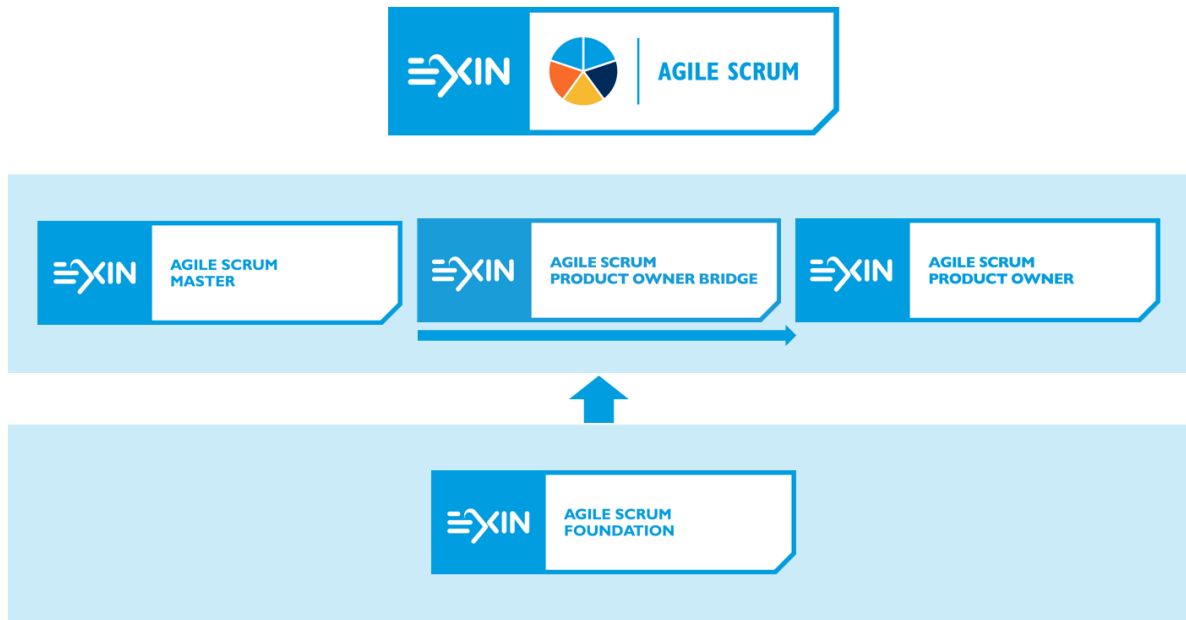

Summary

EXIN Agile Scrum Master is a certification that looks to confirm both skills and knowledge of the Agile framework and Scrum methodology.

Agile Scrum is about working together to successfully reach a goal. Agile methodologies are popular approaches in software development and are increasingly being used in other areas. Scrum practices include establishing cross-functional and self-managed teams, producing a working deliverable at the end of each iteration or Sprint. This certification focuses on adopting Agile or Scrum in the workplace and taking on the role of Scrum Master.

Context

The exam EXIN Agile Scrum Master is part of the EXIN Agile Scrum qualification program and has been developed in cooperation with international experts in the field.

Target group

The Agile way of thinking is best known in the field of software development but the principles are increasingly being applied in other types of projects. Scrum is the most used Agile methodology and is suitable for all professionals looking to keep their knowledge up to date with the latest developments in the fields of IT and Project Management, particularly those leading or participating in projects. In particular, the certification is suitable for professionals working in an Agile context and who have the ambition to facilitate a Scrum team by assuming the role of a Scrum Master.

Requirements for certification

- Successful completion of the EXIN Agile Scrum Master exam.
- Successful completion of an EXIN Accredited EXIN Agile Scrum Master Training including Practical Assignments.
- Knowledge of Scrum terminology, for instance through the EXIN Agile Scrum Foundation exam, is strongly recommended.

Examination details

Examination type:	Computer-based or paper-based multiple-choice questions
Number of questions:	40
Pass mark:	65%
Open book/notes:	No
Electronic equipment/aides permitted:	No
Time allotted for examination:	90 minutes

The Rules and Regulations for EXIN's examinations apply to this exam.

Bloom level

The EXIN Agile Scrum Master certification tests candidates at Bloom Level 2, 3 and 4 according to Bloom's Revised Taxonomy:

- Bloom Level 2: Understanding – a step beyond remembering (Level 1). Understanding shows that candidates can comprehend what is presented and can evaluate how the learning material may be applied in their own environment.
This type of questions aims to demonstrate that the candidate is able to organize, compare, interpret and choose the correct description of facts and ideas.
- Bloom Level 3: Applying – shows that candidates have the ability to make use of information in a context different from the one in which it was learned.
This type of questions aims to demonstrate that the candidate is able to solve problems in new situations by applying acquired knowledge, facts, techniques and rules in a different, or new way. The question usually contains a short scenario.
- Bloom level 4: Analyzing – shows that candidates have the ability to break learned information into its parts to understand it. This Bloom level is mainly tested in the Practical Assignments. The Practical Assignments aim to demonstrate that the candidate is able to examine and break information into parts by identifying motives or causes, make inferences and find evidence to support generalizations.

Training

Practical assignments

Guidelines for practical assignments and a sample set of assignments are available for Accredited Training Organizations on Partnernet.

Contact hours

The recommended number of contact hours for this training course is 16. This number includes group assignments, exam preparation, and short coffee breaks. Not included are: homework, practical assignments, the exam session and lunch breaks. The recommended number of hours for the Practical Assignments is a maximum of 8. The Practical Assignments can be completed outside of the training. They may also be included in the training if the training duration is extended.

Indication study effort

120 hours, depending on existing knowledge. The literature matrix in chapter 4. *Literature* in this Preparation Guide references the body of knowledge that is tested in the exam.

Training provider

You can find a list of our Accredited Training Organizations at www.exin.com.

2. Exam Requirements

The exam requirements are specified in the exam specifications. The following table lists the topics of the module (exam requirements) and the subtopics (exam specifications).

Exam requirement		Weight %
1. Agile way of thinking		15%
1.1	Agile concepts	
1.2	Continuously improving the process	
1.3	Other frameworks and other Agile frameworks	
1.4	Applying Agile principles to IT Service Management	
2. Scrum Master role		22.5%
2.1	Responsibilities and commitment	
2.2	Coaching the team and mediating	
2.3	Other roles (Product Owner, Development Team)	
3. Agile Estimating, Planning, Monitoring and Control		32.5%
3.1	Writing and maintaining the Product and Sprint Backlog	
3.2	Agile Planning	
3.3	Agile Estimation	
3.4	Tracking and communicating progress	
3.5	Staying in control	
4. Complex projects		12.5%
4.1	Scaling Agile projects	
4.2	Suitability of Agile for different types of projects	
4.3	Agile administration in tooling and tool integration	
5. Adopting Agile		17.5%
5.1	Introducing Agile	
5.2	Self-organization	
5.3	Agile requirements and proper environment	
Total		100%

Exam specifications

1. Agile way of thinking

1.1. Agile concepts 5%

The candidate can...

1.1.1 explain the Agile way of thinking

1.1.2 explain how Agility brings predictability and flexibility

1.2 Continuously improving the process 2.5%

The candidate can...

1.2.1 explain how to use continuous improvement

1.3 Other frameworks and other Agile frameworks 5%

The candidate can...

1.3.1 recognize other frameworks and methodologies: Waterfall, Crystal, Lean, XP, DSDM, DevOps.

1.4 Applying Agile principles in IT Service Management 2.5%

The candidate can...

1.4.1 explain how to apply Agile principles within IT Service Management

2. Scrum Master role

2.1 Responsibilities and commitment 7.5%

The candidate can...

2.1.1 explain which tasks and responsibilities belong to the Scrum Master role

2.1.2 explain which solutions are suitable for solving problems

2.1.3 explain which tools to use to facilitate the team

2.2 Coaching the team and mediating	7.5%
The candidate can...	
2.2.1 explain when and how to mediate through conflict	
2.2.2 explain how to coach and challenge the team	
2.2.3 explain the importance of training	
2.3 Other roles (Product Owner, Development Team)	7.5%
The candidate can...	
2.3.1 explain all roles within the Scrum framework	
3. Agile Estimating, Planning, Monitoring and Control	
3.1 Writing and maintaining the Product and Sprint Backlog	7.5%
The candidate can...	
3.1.1 explain why a good Definition of Done is so important	
3.1.2 create and recognize good User Stories	
3.1.3 explain how to maintain the Product Backlog and how to add Product Backlog Items	
3.2 Agile Planning	5%
The candidate can...	
3.2.1 explain iterative planning in all the planning moments: Roadmap, Release and Sprint Planning	
3.2.2 explain the role of the Scrum Master in all the planning moments: Roadmap, Release and Sprint Planning	
3.3 Agile Estimation	10%
The candidate can...	
3.3.1 explain when and how to estimate using Story Points, Ideal Hours and Ideal Days	
3.3.2 explain how to guide a planning session, with and without Planning Poker	
3.3.3 recognize errors in estimation	
3.3.4 explain how to calculate the ROI (Return on Investment)	

3.4 Tracking and communicating progress	7.5%
The candidate can...	
3.4.1 identify impediments, deviations, roadblocks and other obstacles that influence the progress positively and negatively	
3.4.2 explain how to create Information Radiators, how to interpret them and how to act on the results	
3.4.3 explain commonly used tracking methods (Burn-Down Chart, Velocity...)	
3.5 Staying in control	2.5%
The candidate can...	
3.5.1 explain how to manage issues, bugs and informing people outside of the team	
4. Complex projects	
4.1 Scaling Agile projects	5%
The candidate can...	
4.1.1 explain how to use the Product Backlog in a scaled environment	
4.1.2 explain how to scale to larger teams using Scrum-of-Scrums	
4.2 Suitability of Agile for different types of projects	5%
The candidate can...	
4.2.1 explain in which cases it is not possible to use Agile	
4.2.2 identify the limits of a Scrum Team	
4.3 Agile administration in tooling and tool integration	2.5%
The candidate can...	
4.3.1 explain which tools can help a team to use or adopt Agile and thereby increase the quality of the development process	

5. Adopting Agile

5.1 Introducing Agile

7.5%

The candidate can...

- 5.1.1 explain which project management activities are important to include in the transition plan
- 5.1.2 explain which milestones are important in the transition
- 5.1.3 explain how to deal with resistance to change

5.2 Self-organization

The candidate can...

- 5.2.1 explain what self-organization means and how project management is shared 5%
- 5.2.2 explain what it means to have a cross-functional team

5.3 Agile requirements and proper environment

5%

The candidate can...

- 5.3.1 explain what changes in culture need to be made before adopting Agile
- 5.3.2 explain what physical changes need to be made before adopting Agile

3. Basic Concept List

This chapter contains the terms and abbreviations with which candidates should be familiar.

Please note that knowledge of these terms alone does not suffice for the exam; the candidate must understand the concepts and be able to provide examples.

Affinity estimation	Originator
ADAPT (Awareness, Desire, Ability, Promote and Transfer)	Pair programming
Agile Manifesto	Planning
Burn-down (bar) chart	Planning onion
Champion skeptic	Planning poker
CMM Key Practice Area (KPA)	Pragmatist
Coach	Product Backlog
Commitment	Product Backlog Item (PBI)
Conserver	Product Owner
Continuous integration	Refactoring
Crystal	Release Burn Up
Customer	Release Burn-Down (bar) chart
Customer Relationship Management System (CRM)	Release planning
Customer Service Management System	Resistance
Daily Scrum / stand-up	Return on Investment (ROI)
Definition of Done (Done)	Saboteur
DevOps	Scrum
Diehard	Scrum Master
Distributed team	Scrum-of-Scrums
DSDM	Skeptic
Elapsed time	Splitting teams
Enterprise Transition Community (ETC)	Sprint
	Sprint Backlog

Epics	Sprint Backlog Item (SBI)
Escaped defect	Sprint Planning
Estimation	Sprint Retrospective
Extreme programming (XP)	Sprint Review
Follower	Story point
Gantt Chart	Task Board
Ideal hours/ Ideal days	Team
Improvement Community (IC)	Test-driven (software) development
Increment	Time-box/Time-boxing
Information radiator	Triangulation
Internal coaching	User Story
Internal Rate of Return (IRR)	Velocity of the team
IT Service Management (ITSM)	Waste
ITIL	Waterfall
Lean	Workspace
MoSCoW	
Net Present Value (NPV)	

4. Literature

The knowledge required for the Agile Scrum Master exam is covered in the following literature.

Exam literature

- A. Cohn, Mike
Succeeding with Agile: Software Development Using Scrum
Pearson Education (2009)

Comment

Additional literature is for reference and depth of knowledge only.

Literature matrix

Exam requirement			Literature	Size
1. Agile way of thinking				15%
1.1	Agile concepts			
1.1.1	Explain the Agile way of thinking		A, Chapter 2	
1.1.2	Explain how Agility brings predictability and flexibility		A, Chapter 5, 14, 15, C	
1.2	Continuously improving the process			
1.2.1	Explain how to use continuous improvement		A, Chapter 4, 7, C.	
1.3	Other frameworks and other Agile frameworks			
1.3.1	Recognize other frameworks and methodologies: Waterfall, Crystal, Lean, XP, DSDM, DevOps.		B, Chapter 17 and EXIN Basic Training Material	
1.4	Applying Agile principles to IT Service Management			
1.4.1	Explain how to apply Agile principles within IT Service Management		A, Chapter 14, E	
2. Scrum Master role				22.5%
2.1	Responsibilities and commitment			
2.1.1	Explain which tasks and responsibilities belong to the Scrum Master role		A, Chapter 7	
2.1.2	Explain which solutions are suitable for solving problems		A, Chapter 6, 7, 17	
2.1.3	Explain which tools to use to facilitate the team		A, Chapter 7, 20	
2.2	Coaching the team and mediating			
2.2.1	Explain when and how to mediate through conflict		A, Chapter 18	
2.2.2	Explain how to coach and challenge the team		A, Chapter 3, 18	
2.2.3	Explain the importance of training		A, Chapter 6, 7, 11	

2.3	Other roles (Product Owner, Development Team)		
2.3.1	Explain all roles within the Scrum framework	A, Chapter 7, 10, 11, C	
3. Agile Estimating, Planning, Monitoring and Control			32.5%
3.1	Writing and maintaining the Product and Sprint Backlog		
3.1.1	Explain why a good Definition of Done is so important	A, Chapter 14, C	
3.1.2	Create and recognize good User Stories	A, Chapter 12, 13, B, Chapter 12	
3.1.3	Explain how to maintain the Product Backlog and how to add Product Backlog Items	A, Chapter 13	
3.2	Agile Planning		
3.2.1	Explain iterative planning in all the planning moments: Roadmap, Release and Sprint Planning	B, Chapter 3, 13, 17	
3.2.2	Explain the role of the Scrum Master in all the planning moments: Roadmap, Release and Sprint Planning	B, Chapter 15, C	
3.3	Agile Estimation		
3.3.1	Explain when and how to estimate using Story Points, Ideal Hours and Ideal Days	B, Chapter 4, 5, 8, 14	
3.3.2	Explain how to guide a planning session, with and without Planning Poker	B, Chapter 6, 14, C	
3.3.3	Recognize errors in estimation	B, Chapter 1, 7 and 16	
3.3.4	Explain how to calculate the ROI (Return on Investment)	B, Chapter 10	
3.4	Tracking and communicating progress		
3.4.1	Identify impediments, deviations, roadblocks and other obstacles that influence the progress positively and negatively	B, Chapter 19	
3.4.2	Explain how to create Information Radiators, how to interpret them and how to act on the results	B, Chapter 19, 20	
3.4.3	Explain commonly used tracking methods (Burn-Down Chart, Velocity, ...)	B, Chapter 19	

	3.5	Staying in control		
	3.5.1	Explain how to manage issues, bugs and informing people outside of the team	B, Chapter 14, 20	
	4. Complex projects			12.5%
	4.1	Scaling Agile projects		
	4.1.1	Explain how to use the Product Backlog in a scaled environment	A, Chapter 17	
	4.1.2	Explain how to scale to larger teams using Scrum-of-Scrums	A, Chapter 17	
	4.2	Suitability of Agile for different types of projects		
	4.2.1	Explain in which cases it is not possible to use Agile	A, Chapter 15, 17, C	
	4.2.2	Identify the limits of a Scrum Team	A, Chapter 10, 17, C	
	4.3	Agile administration in tooling and tool integration		
	4.3.1	Explain which tools can help a team to use or adopt Agile and thereby increase the quality of the development process	A, Chapter 2, 3, 18	
	5. Adopting Agile			17.5%
	5.1	Introducing Agile		
	5.1.1	Explain which project management activities are important to include in the transition plan	A, Chapter 2, 5, 8	
	5.1.2	Explain which milestones are important in the transition	A, Chapter 2, 3	
	5.1.3	Explain how to deal with resistance to change	A, Chapter 6	
	5.2	Self-organization		
	5.2.1	Explain what self-organization means and how project management is shared	A, Chapter 10	
	5.2.2	Explain what it means to have a cross-functional team	A, Chapter 10, 11, B, Chapter 6	

5.3	Agile requirements and proper environment		
5.3.1	Explain what changes in culture need to be made before adopting Agile	A, Chapter 1, B, Chapter 3	
5.3.2	Explain what physical changes need to be made before adopting Agile	A, Chapter 9, 18, 20	
Total			100%
